

There is a phrase "Absolute needs, Light and Salt"
It means light and salt are basic and crucial in our lives.
Any terrestrial lives can live without salt.

"The Koreans are the only people who has the wisdom to increases the value of salt by roasting. We can aasert that we who has that wisdom will lead the world's salt market."
And Korea Salt Co.,Ltd. is the world-best in salt processing technique.

As above photo, Korea Salt's bamboo salt plant is Korean style structure. Bamboo salt workroom's pillars are structured with entasis pillar. It is built by very difficult method of construction, which is peeled over 300 times of ink-pot strings. And we decreased the number of pillars for forklift's passage by using 2.5 tons of huge beam. Rafters make its splendor awesome, earthen tiles make appearance elegant and gives it a longer life. Korean style house is especially strong to salinity, it can safely maintained for centuries. Furthermore, it is green structure. And overseas buyers always admire the beauty of Korean-style structure.

We possess the matchless technique in processing bamboo salt which is nowhere in the world. We will develop the natural remedy which can cope with various disease, it is totally different from composed drugs or medicine.

Korea Salt Co., Ltd. always work towards 30 years after, we dream to rank with world's pharmaceutical companies. We will do our best to be the unique and reliable company after promised 30 years to our customers. We hope you to keep paying attention and support us.

How to select the grain size of Bamboo salt :

We have 3 size of grains – granular, middle and big.
The most popular grain to use is granular and middle size.
Please refer the below.

Small grain (granular) :

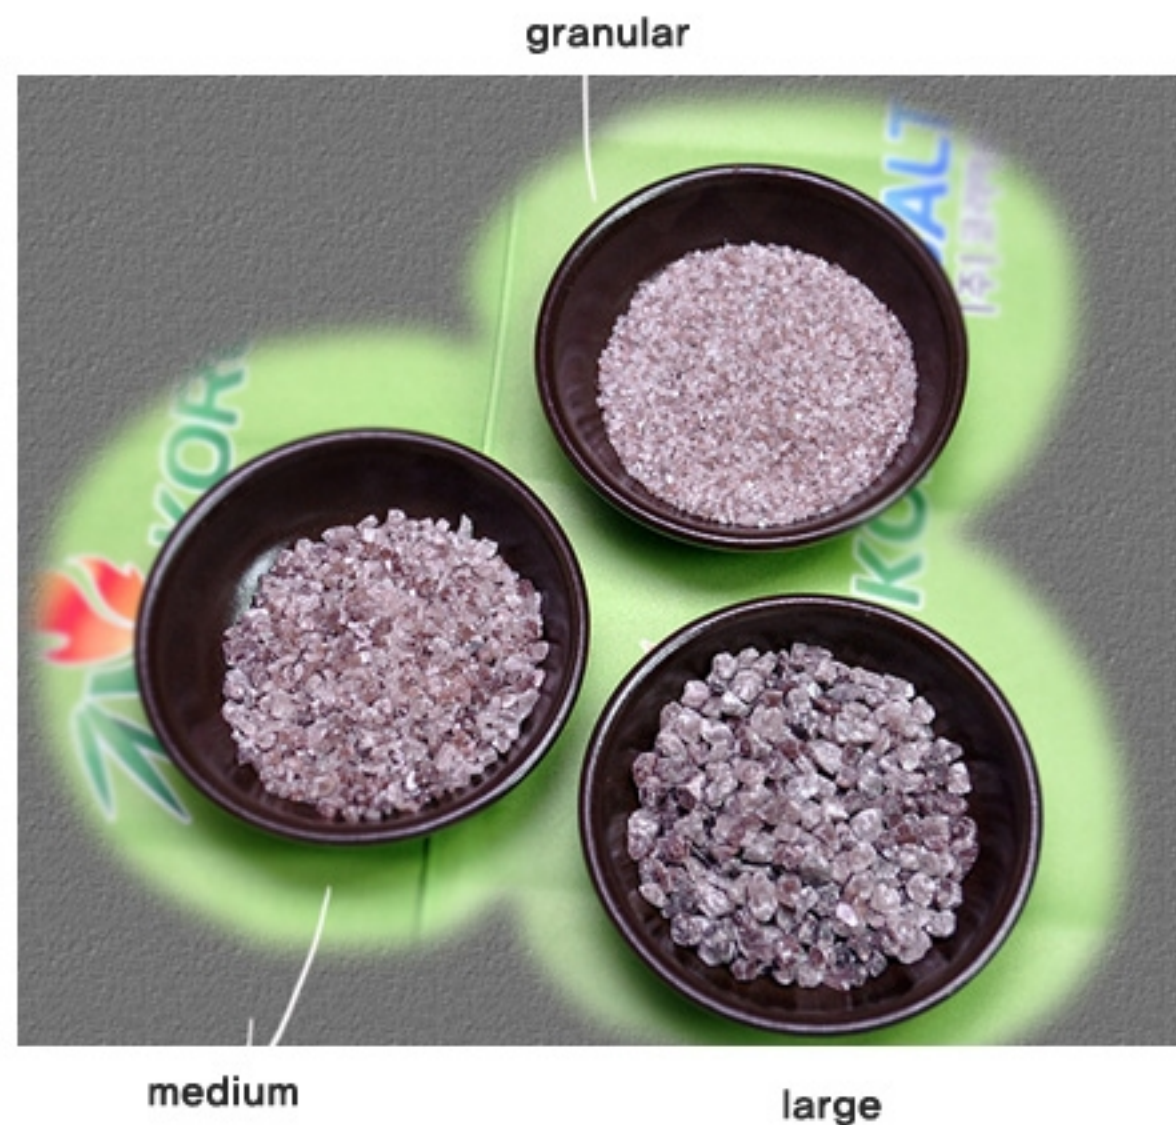

It is the millet grain size, good size for beginners for bamboo salt or children.
Good to cook meat, soup and easy to dissolve in water, popular size with the most uses.

Middle grain :

a bit smaller or bigger size than rice grain

Large grain :

Bigger size than beans, good for experienced people for bamboo salt

9 times Roasted Bamboo salt grain type 250g
(granular, middle, large Size)

9 times Roasted Bamboo salt grain type 1kg
(granular, middle, large Size)

9 times Roasted Bamboo salt grain type 60g
(granular Size)

9 times Roasted Bamboo salt grain type 25g
(granular Size)
